

Improve your pipetting

Webinar - Learn ergonomic best practices that support safe pipetting for consistent, accurate results

Join us on Wednesday 23rd February, 2022 and learn how to pipette safely with our expert guide to ergonomics and best practices.

By attending this webinar, you will gain:

- An understanding of good pipetting ergonomics
- Awareness of pipetting risk factors and when to avoid them
- Recommendations for good pipetting posture and environment
- Tips and advice to reduce pipetting forces and improve comfort and consistency

Who should attend?

- Any scientist working in a life science lab that carries out pipetting will learn something that supports them to pipette accurately and comfortably
