Reduced calibration time

Quick connect feature reduces time and cost of routine calibration

MET ONE 7000 remote particle counters are designed using patented technology to comply with new ISO 21501 calibration requirements that ensure measuring 0.3 µm to 10.0 µm particles with accuracy and repeatability. With flexible communication and OPC server options, the MET ONE 7000 easily integrates to any Facility Monitoring System. Built-in indication lights notify users of particle events such as reaching an alarm or alert level, eliminating the need to install additional hardware in the sterile environment.

Specially selected optical component materials and effectively sealed 316L stainless-steel enclosure make the MET ONE 7000 tolerant to typical VHP based disinfecting cycles and washdown processes used in cleanrooms. Features such as DIP switches for address setting, quick-connect cables and tubing reduce instrument removal and reinstallation time during routine calibration and maintenance work. Built with Long Life LaserTM technology and supported by dependable after sales support from Hach, the MET ONE 7000 minimizes cost of ownership and offers unparalleled user experience in product quality and reliability.
