LABstar

WORKSTATION

The LABstar workstation is a ready to operate high quality glovebox system that meets your specific application requirements. The LABstar workstation features a large main antechamber, 10 cfm vacuum pump, and programmable logic controller (PLC). Other standard features include an automatic regenerable oxygen and moisture single column inert gas purification system that purifies the glovebox atmosphere to levels of less than 1 ppm oxygen and moisture.

LABstar Standard Features:

- Programmable logic controller
- Large main antechamber
- Three glovebox sizes available
- Vacuum pump
- Automatic regenerable H₂O/O₂ single inert gas purifier
- World-wide operation using standard power supply
- Integrated high vacuum feedthroughs
- Stainless steel adjustable shelving
- Stainless steel piping

LABstar Optional Features:

- Mini-antechamber
- H₂O/O₂ analyzer
- Freezer
- Box filter with activated charcoal
- Microscope equipment
- Dry scroll pump
- Automatic antechamber controls
- Siemens PLC touch screen controller
- Auto purge function
- Other options available

UNIlab

WORKSTATION

The UNIlab workstation is the next step up from the LABstar workstation in the MBRAUN standard glovebox line. The UNIlab glovebox is a ready to operate high quality glovebox that includes a large main antechamber, 10 cfm vacuum pump, and Siemens touch screen controller. The UNIlab workstation features an automatic regenerable oxygen and moisture single column inert gas purification system that purifies the glovebox atmosphere to levels of less than 1 ppm oxygen and moisture.

UNIlab Standard Features:

- Siemens PLC touch screen controller
- Large main antechamber
- Three glovebox sizes available
- Vacuum pump
- Automatic regenerable H₂O/O₂ single inert gas purifier
- World-wide operation using standard power supply
- Integrated high vacuum feedthroughs
- Stainless steel adjustable shelving
- Stainless steel piping

UNIlab Optional Features:

- Mini-antechamber
- H₂O/O₂ analyzer
- Dry scroll pump
- Freezer
- Box filter with activated charcoal
- External solvent absorber
- Auto purge function
- Microscope equipment
- Automatic antechamber controls
- Other options available

LABmaster SP/DP

WORKSTATION

The LABmaster workstation offers additional features and benefits compared to the UNIlab and LABstar workstations. The LABmaster glovebox is the top of the line workstation featuring a modular designed workspace, large main antechamber, 10 cfm vacuum pump, and Siemens color touch screen controller. The LABmaster offers automatic regenerable oxygen and moisture gas purification units with single or double filter columns that purify glovebox atmosphere to levels of less than 1 ppm oxygen and moisture.

LABmaster sp/dp Standard Features:

- A variety of modular glovebox sizes available
- Siemens PLC touch screen controller
- Large main antechamber
- Vacuum pump
- Automatic regenerable H₂O/O₂ single (sp) / double (dp) Inert gas purifier
- World-wide operation using standard power supply
- Integrated high vacuum feedthroughs
- Stainless steel adjustable shelving
- Stainless steel piping

LABmaster SP/DP Optional Features:

- Mini-antechamber
- H₂O/O₂ analyzer
- Freezer
- Vacuum oven 250°C and 600°C
- Box filter with activated carbon
- External solvent absorber
- Dry scroll pump
- Microscope equipment
- Mechanical door locks
- Automatic antechamber controls
- Auto purge function
- Other options available
