

## Labnet FastPette™ Pro Pipet Controller

### Lightweight, ergonomically shaped pipet controller designed for work convenience

The FastPette Pro is a lightweight and ergonomically designed automatic pipet controller ideal for liquid handling with 0.5 to 100 mL glass or plastic serological pipets. Conveniently positioned switches allow toggling of operation modes and aspiration speeds for high precision handling to suit different pipet volumes and liquid viscosities. Additionally, aspirating and dispensing speed is controlled by means of two comfortable finger triggers. Liquids can be dispensed by gravity or by blow out using the motorized pump.

In order to protect the device against overfilling, the FastPette Pro is equipped with a 0.2 µm PTFE filter. The PTFE filter, pipet holder and nosepiece are fully autoclavable and can be individually replaced as needed.

### Features

- ▶ Triggers convenient for one or two finger control of speed and mode

- ▶ LCD display for convenient visualization of speed, modes, and battery status

- ▶ Easy access to the battery compartment. NiMH batteries allow cordless work for up to 8 hours

- ▶ Charging stand for bench or wall mounting
- ▶ Autoclavable pipet holder
- ▶ 1 year warranty
